DETAILED ACTION

Allowable Subject Matter

1. Claims 12-15 and 17 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest either alone or in combination thereof:
 - regarding claim 12, a method used by a portable terminal for gaining access to a communication network comprising
 - (b) waiting for a first predetermined time in order to receive a synchronization message from the access point;
 - (c) sensing the communication channel for a second predetermined time to determine if the channel is busy;
 - (d) transmitting a request for poll to the access point if the channel is clear for the second predetermined time; and
 - (e) if the channel is busy during the second predetermined time, repeating operation (b);
 - regarding claim 15, a method comprising:
 - (a) generating a pseudo-random number corresponding to a first pseudo-random time which is at least as long as the interpoll gap time;
 - (b) sensing a channel for a time substantially shorter than the first pseudo-random time;
 - (c) repeating operation (b) until the channel is detected as being busy, or the channel is detected as being clear at every sense until the first pseudo-random time is reached;

Art Unit: 2876

(d) if the channel is detected as being busy, executing a second pseudo-random time delay back-off and returning to operation (a); and

(e) if the channel has been detected as being clear for the entire first pseudo-random time period, transmitting a request for poll frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
